**THE FIRST AND MOST ADVANCED AVIATION LEARNING FACILITY DEBUTS IN
THE U. S. PUBLIC SCHOOL SYSTEM. 8th GRADE STUDENTS ENJOY HANDS-ON
AVIATION TRAINING.**

AUSTIN, TEXAS, January 2000 – Advanced Simulation completes installation of the Sanford Flight Lab in Sanford, Florida. The Sanford Flight Training Lab is the most technologically advanced & comprehensive Aviation learning facility in the U.S. public school system. Florida's Seminole County Public Schools lead the nation with this innovative magnet program designed to give students a solid foundation in aviation. Sanford Middle School students learn basic aerodynamics, aircraft systems, instrumentation, navigation, weather, Air Traffic Control, the role of the FAA & NTSB, aviation regulations, and pilot skills. Two TRACON RADAR simulators, four flight support lab stations, one flight control equipped pilot training simulator, and a full function, high fidelity flight simulator support this hands-on program. Visit <http://www.flightsimulation.com/lab/> to learn more about the Sanford Flight Lab and for school contact information to arrange interviews and photo sessions.

Advanced Simulation Systems, Inc. provides cutting edge flight simulation and Air Traffic Control solutions to benefit civilian and military training as well as home and location-based entertainment. The company offers turn key flight simulators, flight training devices, ATC RADAR and Tower Cab simulators, cockpits, flight controls, flight consoles, avionics stacks, terrain databases, imagery, image generators, software, air combat training systems and custom solutions using open standard PC technology and COTS (commercial-off-the-shelf) components. Advanced Simulation specializes in emerging technology that provides high level capability at relatively low cost. The company pioneered the *SCALPEL 6* Reconfigurable task and procedure training simulator.
